Vol. 4 #2

QC INSPECTION SERVICES LTD.

Newsletter

We will be closed Dec. 22 - 29th for Christmas and will re-open again on Tuesday January 2, 2001. The "On Call" person for this period can be reached at (780) 991-4138

Pipeline: When testing CSA Z662 pipeline welders using ASME for "Tie-ins" or "Fittings", all work may be done under ASME. There is no need to apply any Z662 requirements, unless the owner has specifically requested supplementary conditions. Please call if you would like further information.

Announcements

At QCI…

Welcome: to Pamela Guest, our Receptionist who joined QCI, November 6, 2000

Congratulations to

Greg Yarkie - has successfully completed his level II Ultrasonic

Mike Kereliuk who was married this past summer.

Lifting Equipment Safety: An Edmonton employer was recently fined $45000 for failure to ensure that a crane was used, handled, serviced, maintained and repaired in accordance with the manufacturer's specifications that, among other related failures, caused a fatality. Please call if you would like further information or have equipment that should be inspected.

Joke

"And God said: 'Let there be Satan, so people don't blame everything on me. And let there be lawyers, so people don't blame everything on Satan"
- John Wing

To better serve our clients we have implemented an automated phone attendant. Please let us know how it's working.

Trucking Companies: The new CSA B619-00 "Carrier Safety Management Systems" is expected out soon. Under this new standard, carriers are required to develop and implement an effective safety management system. Please call us if you would like further information or need assistance with any inspections for B619.

Did you know…

• Since 1998 a new designation "-17" for stainless steel electrodes (SFA 5.4) has been in effect. Many suppliers now have limited supplies of the "-16" electrodes. The covering of the "-17" electrodes is a modification of the "-16". This difference warrants a separate classification. With limited supplies of the "-16" electrodes and older stainless steel weld procedures not including the "-17" classification a need revision is needed. If you would like more information please call.
