VOL 5 ISSUE 3

Hail and Farewell...

QC Inspection Services is proud to welcome Ravi Govindasamy, E.I.T. to our team. Ravi is an Engineer in Training and will be a great asset in our goal for providing superior customer service. We would like to also welcome Travis Cook and Mark Radmanovich.

We would like to say goodbye to two employees. Melissa Reekie, a materials engineering technology student, has gone back to NAIT to finish her studies. We hope she will return when she is finished. Also, goodbye to Greg Yarkie

It's A Boy...

Congratulations to John & Heather Sprentz on having a healthy baby boy on Aug 22nd. Both Mother and baby are doing fine and John is surviving.

Birthday Wishes...

Happy Birthday to Pam Guest – Aug 18th and James Ma – Sept 4th.

Equipment...

To speed up the process and help keep costs down, please take care when scheduling equipment inspections. Ensure the equipment is free from grease, oil, mud, dirt, etc. It is helpful to have all covering panels or attachments that limit access removed. By having these items addressed prior to the inspector's arrival, you will eliminate the higher costs of an inspector performing cleaning, or waiting for removal of panels. If you have any questions, please contact QC Inspection at 1-800-621-8979.

Structural...

Please remember, since torch cutting causes a high stress quenched area, it is essential that all coped corners be ground smooth, no matter how smooth the torch cut surface looks. Even small notches can be critical.

ASME Code Books – Reminder

Most current codes expire December 31, 2001. To order your new replacements please contact Anita at 1-800-621-8979 or e-mail: anita@qcisl.com.

Tank Trucks...

Recently there were changes to the ABSA Regulation for AR227/75 relating to longitudinal seams in the upper half of the vessel for TC331 Highway Tanks and MC331 & MC330 Cargo Tanks. For more information please contact QC Inspection at 1-800-621-8979 or the ABSA office nearest you.

Dangerous Goods Cylinders...

Did you know it is an offence under the Transport of Dangerous Goods Act (1992) to use cylinders that do not comply with the prescribed cylinder standards? Approved cylinders must display the Transport Canada 'TC' specification number on every cylinder. For further information please contact QC Inspection at 1-800-621-8979 or the Regional Transportation of Dangerous Goods (TDG) office nearest you.
