Qualimet News

QC Inspection Services™

7817 Coronet Road, Edmonton, AB T6E 4N7

VOL 6 ISSUE 3

"Your source for Quality Materials Engineering"

From The Desk Of...

The General Manager

We are moving into the Summer construction season and Qualimet is ready to handle far more projects than ever. We had our biggest sales year in 2001, added a number of highly skilled staff, as well as new testing equipment. We look forward to serving our clients and remind them that Qualimet is much more than a testing & inspection company. We are a full service Materials Engineering Company with accreditation and certifications from the Association of Professional Engineers.... of Alberta and British Columbia, Alberta Boiler Safety Association, Canadian Welding Bureau, Canadian Standards Association, Canadian General Standards Board, National Institute for Standards and Testing, and Transport Canada. We have come a long way with our range of services over the years, especially since the change of management in 1993. Thank You to all our Clients for your support and confidence in our abilities to serve you. It is you the Client that has allowed us to grow to serve you even better.

Thank-You!

Welcome...

Melissa Reekie our newest Materials Engineering Technologist – Graduate of NAIT 2002.

It's That Time Again...

Our annual Bar-B-Q is coming up on June 14, 2002,

from 11:00am to 2:00pm at the Edmonton office. Steaks and refreshments will be served. We look forward to this time to meet with clients, business associates and friends.

Hope to see you here! Please RSVP by indicating below and fax or e-mail reply to Pam by June 7th.

Name: _____

Company: _____

Number attending: _____

Fax: 780-465-5829 or e-mail to Pam at: pam@qualimetinc.com.

ABSA Update...

The new ABSA Form AB-40 for repair and alterations is now out and available on their website. Check it out at:

www.albertaboilers.com

Birthday Wishes...

Jan Keith – May 12th

Wally Bohdanowich – May 6th

Ravi Govindasamy – April 16th

Happy Birthday!!

Pressure Equipment Warning...

Internal Vessel Cleaning & Maintenance. There are many hazards, two of them being confined space and explosive mixtures. Hot water cleaning can release hydrocarbons to exceed the lower explosive limit and increase the H2S in the air. Be sure to consider the cleaning method with respect to purging, ventilating, and using effective confined space procedures.

Tank Trucks...

It's getting close. As of August 15, 2002, all tank truck facilities registered with Transport Canada must be certified to CSA B620-98. Please call for further details.

Equipment Certification...

Please remember that in accordance with Occupational Health & Safety Regulations, if your equipment should suffer a severe impact or be damaged, the Engineers Certificate becomes null & void. The equipment must be repaired and re-inspected under the direction of a Professional Engineer registered in the Province where the equipment is being used.
